Welcome to [WordPress.com](http://WordPress.com). After you read this, you should delete and write your own post, with a new title above. Or hit [Add New](#) on the left (of the [admin dashboard](#)) to start a fresh post.

[Here](#) are some suggestions for your first post.

1. You can find new ideas for what to blog about by reading [the Daily Post](#).
2. Add [PressThis](#) to your browser. It creates a new blog post for you about any interesting page you read on the web.
3. [Make some changes to this page](#), and then hit preview on the right. You can always preview any post or edit you before you share it to the world.

## Qumana, una gran ayuda para los bloggers

Publicado el [febrero 7, 2011](#) por [ibolea](#)

Escribir en un blog o tener un blog propio es toda una experiencia: el poder tener un lugar donde expresar nuestras ideas, la satisfacción de cuando alguien te dice que leyó un post tuyo o que te “sigue” activamente, al menos para mí, es realmente grande.

Pero hay que reconocer que mantener uno o varios blogs es un “trabajo” que muchas veces resulta complicado; no solamente me estoy refiriendo al intentar llenar de contenido los posts de tu blog, sino al arduo trabajo de escribirlo sobre los interface que nos dan las plataformas “tradicionales” como blogspot o wordpress: pueden definirse como “castaña” programada en java o php que muchas veces dependen de nuestra conexión a internet y del estado de la red.
